

Junair Environment Statement

At Junair Spraybooths Ltd we recognise the critical role we play in safeguarding our planet. We are actively committed to reducing our environmental impact and continually improving our environmental performance in all our operations and business activities. We encourage customers, suppliers and other stakeholders to do the same to help contribute to a healthier planet and a better future.

Our Commitments

Minimising Environmental Impact – We strive to minimise the effects of our operations on the environment by reducing waste, conserving resources and preventing pollution.

Compliance – Ensure that we comply with all relevant environmental legislation, regulations and requirements. Our commitment extends beyond compliance – we strive to exceed legal requirements and continuously improve our environmental performance.

Resource Efficiency – We pledge to minimise waste by evaluating our operations and ensuring they are as efficient as possible by implementing recycling programs, reduce consumption of resources and explore new sustainable practices.

Education – We commit to actively promote recycling both internally and amongst our customers and suppliers.

Sustainability – We commit to working with partners who share our values, to offer a product range that minimises environmental impact and to choose environmentally friendly materials and suppliers whenever possible.

Improvement – We will continually seek to identify areas for improvement of our environmental performance, minimise the impact and damage of our operational activities by regularly reviewing and checking our performance against our environmental goals and by education of our employees, customers and suppliers.

Our Goals

Our key environmental goals are to consistently improve our organisation's impact on the environment. We aim to achieve this by:

- Reducing our carbon footprint by implementing energy efficient practices, exploring renewable energy sources and continuously monitoring changes in legislation, adapting our practices accordingly.
- Minimising waste and maximising efficiency through careful and efficient use of resources.
- Promoting recycling and the use of recycled and refurbished products and materials where such alternatives are economical and suitable.
- Collaborating with partners who prioritise eco-friendly materials and practices and to encourage sustainable practices throughout our supply chain.
- Designing our products with a focus on resource efficiency and longevity to minimise environmental impact throughout their lifecycle.
